Japanese Gunboat Protecting Property

REFUGEES IN THE JAPANESE CONCESSION

The agitation against the Japanese at Hankow continues, and picketting is still proceeding outside their concession. The Chinese, while intimidating their fellow-countrymen in Japanese service, are not molesting anyone else. A Japanese gunboat is on the spot to protect their property. The Japanese regard the situation as being 31, stated: very serious and are keeping to their concession.

FURTHER DETAILS OF THE TRAGEDY

GRAPHIC STORY

How Yang Yu-ting, and Chang Yin-chua Died

JAPAN DEEPLY INTERESTED

That Yang Yu-ting's tragic death at Mukden has caused a tremendous sensation in Tokyo and elsewhere is evident. Further details of the tragedy are to hand, from which it will be seen that the execution of General Yang Yu-ting and General Chang Yin-chua was planned in Mukden's highest circles. The victims are accused of having been engaged in a conspiracy against Marshal Chang Hsueh-liang and of being engaged in secretly manufacturing 20,000

delicacy of the situation. They appear, however, to think that it will not affect Japan for the time being, though likely to increase the difficulties in the future in negotiating questions concerning Manchuria, as Chang Tsohsiang, Governor of Kirin, who appears to be the leading behind the coup d'etat is regarded as being

anti-Japanese. Moreover, with the removal of Yang Yu-ting, who opposed the hoisting of the National

flag, closer co-operation with Muk-

den and Nanking is likely to be

witnessed, while the latter's control of Manchurian affairs will probably be increased. The Political Situation The vernacular newspapers gen-

erally are agreed that the coup will complicate the political situation in Manchuria and home. They fear Yang Yu-ting's followers will find an early opportunity to take revenge, thus causing disturbances which may necessitate Japan taking steps to protect Japanese lives and property; 3 though official circles appear to think an uprising is unlikely. It is generally agreed that predic-

tions are useless until the true

nature of the coup and Chang

Haueh-liang's own position thereanent, is clarified. Alleged Conspiracy

A message from Mukden states that following the execution of Yang Yu-ting and Chang Yinghua their residences were searched and a number of important documents were found. It is alleged that these show they were hatching a conspiracy against Chang Haueh-liang and also secretly manufacturing 20,000

rifles at the Mukden Arsenal. Another Mukden message says that regarding the execution of Yang Yu-ting and Chang Yin-chua it is reliably stated that Chang Haueh-liang telephoned inviting them to play mah-jongg on Thursday evening. On their arrival Yui Ta Ba Chiu, (d) Hou Tim Lui, | Chang Hsueh-liang excused himself respectively, "The Monk's Prayer," on the ground of receiving medical "Two Butterflies," "Raindrops on treatment. He retired from the Banana Tree," and "Fairweather | room, whereupon a score of armed Thunderstorm" (Harry Ore) to be soldiers entered and opened fire.

It is reported that Yang Yu-ting Elegie for Cello and Piano received ten shots on the head and (Harry Ore) M. and Mme. one on the foot while Chang Yinghua, who attempted to use his revolver, was hit by more than a dozen bullets-Reuter

EVANS OF "BROKE"

Australia's Navy

London, Yesterday. Rear-Admiral E. R. G. R. Evans, C.B., D.S.C., (of H.M.S. "Broke" fame) has been uppointed to command the Australian Navy in succession to Rear-Admiral Richard Hyde, M.V.O., C.B., C.B.E., as from March 18.—

[It will be recalled that Cap-] tain Evans (as he then was) was in command of H.M.S. "Carlisle" in 1921, when she rescued 228 Chinese from drowning at the "Hong Moh" disaster in the China Sea. Captain Evans is also a distinguished Antarctic explorer. He returned in command of the British Antarctic Expedition in 1918, after the death of the gallant Captain Scott. He is more familiarly known as "Evans of the Broke" (due to that ship's famous exploit in 1917) and among a wealth of honours, he holds the Royal Humane Society's silver medal for saving life. He is the author of several works on Polar exploration. When on the China Const he delivered lectures, chiefly on his Antarctic experiences, at several ports.]

BILLIARDS WIZARDRY

London, Dec. 1. In no game is the margin of skill between amateur and professional greater than it is in billiards. Why it should be so is difficult to understand, for many of the unpaid get as much practice as do scoring machine the game has ever coming of a greater. Most players would like to know how he does no doubt give the reply that was days, "Keep the other fellow off the table."

The League Flag With the defeat of the Heart Midlothian at Kilmarnock is almost a foregone conclusion that the Scottish League flag will again be flown over Ibrox Park. The Rangers have lost but one point to the eight of the Celtic and ten each of the Hearts and Motherwell. The last three mentioned, however, should provide a great fight for second place. Unless there is a speedy recovery, deposition will be the lot of Raith Rovers, and their companions will be, as results to date indicate, Covidenbeath, Dundee, or Airdrieoniaus Dun (ec Unite) are heading strongly for promotion, but who will accompany them into the upper circle is still an open question. Very little separates the next seven clubs, which number include both Leith Athletic and St. Bernards. The season is not yet half run; and there can be many surprises between now and the end of April.

Falkirk's Changes

It is scarcely credible, but none the less true-and it may interest Looker-On (writes a Falkirk correspondent) -- that since the commencement of the present season Goalie-Painter there have been exactly 50 changes | Goalkeepers are peculiarly libale in the Falkirk team placings, and to accident. The team chosen to do duty at Hampden. showed four more changes, and this, of course raised the total to 54. Tom Ferguson, the only ever-present of the Falkirk team, may write on "Centre half-backs I have played behind," but some day we may have a treatise from Brockville on "Team-Building After You've Sold Your Bricks!"

Friends in Hong Formerly in Kong of Lieut. Hong Kong C. C. L'Estrange Grant, R.N., who was tried by Court Martial on H.M.S. "Berwick" here last summer, will learn with pleasure of his appointment to H.M.S. "Empress of India," a 25,000 tons

battleship in the Atlantic Fleet. The trial was noteworthy for an unintentional remark by the prosecutor about the Hong Kong Club and a reply thereto by the defending solicitor who, nowever, emphasised that he "held no brief for the Club." Lt. Grant came out on "Berwick" for a second spell of duty on the China Station, having been here some time before that. He was appointed to his present rank on Feb. 15, 1923, and is qualified in Submarine

duties.

"From Calais to China's Kowloon, from Paris Railways to Peking"—not by air but on rails and making use, of course, of the great Trans-Siberian Railway, now apparently in very good working order. This railway, indeed, appears to be the only sensible and practical concern the Russians have in hand, and it came to them from the much despised Romanoff regime. We admire it immensely, all the far-off West with the Far East. Years and years ago the phrases quoted above were even more vital than they are to-day, for then (say fifteen to twenty years ago) China really seemed to be forging ahead with her railways, and the probability of one completing by rail the journey from Calnis to Canton or Kowloon was regarded as being merely a matter of time. And it has been

But now that China, for the first time for at least fifteen years seems really at peace-(we must for the moment forget the little squabble in progress at present in Szechuan)—there again some hope of the necessary railway projects materialising China. A the present moment travelling by rail from Calais to Hankow quite feasible and has been done more or less regularly for many years past. But the railway schemes to link up the Yangtsze provinces with the South have long been in abeyance, though surveying has taken place and, in certain parts, work actually uncertaken. A Step in the Right Direction

IT has not, we are happy to record, taken long for some of the good seed sown by Sir Cecil Clementi in Whitehall to be reaped in Hong Kong. We refer to the announcement published in another part of this issue that power has been received from Home for the Kong Kong Legislative Council to be increased, in regard to Unofficial Members, in strength from six to eight. An increase of two in the number of Official Members is also authorised, obviously to maintain the Governmental majority, and this is a step which cannot be considered unexpected. Our concern, of course, is with the additional Unofficials, for it points to Kowloon in future possessing at least one representative on the Council. Sir Cecil, it may be remembered, before he departed on leave, definitely stated that in his opinion, Kowloon should have a voice in the deliberations of the Council, and whilst at Home, in an interview, he repeated these sentiments, which, shortly, will be carried into effect. In this connection H.E. the Governor deserves the thanks of the Colony as a whole, and we venture to congratulate Sir Cecil upon accomplishing in such a short period of time something which he felt was in the interests of Hong Kong as a part of the Empire and Hong Kong as a place to live in.

Conjecture, most naturally, is rife as to why two additional appointments to the Legislative Council have received official sanction by the Secretary of State for the Colonies. In the new instructions under the Royal Seal Manual concerning the constitution of the Councils. Executive and Legislative, there are no indications as to where or to whom the extra Councillors will be allocated. surmise which is quite reasonable—and one for which we have entirely no authority whatever for advancing-is that Kowloon will absorb both appointments, one for a European and the other for a Chinese. It seems obvious, however, from a reading of the at least a little power. Wan-throw a searchlight on the matrinew instructions, that the power to appoint is vested in the Governor and we must, therefore, await an official announcement of some kind upon this very important point.

The point, of course, is full of interest, for none of the Unofficial Members of the Legislative Council, as at present constituted, is elected in the real sense of the term. None, also, has to represent such widespread interests as a Member for Kowloon would have to represent. It is not to be considered for one moment, we suppose, that anything resembling the establishment of election machinery will result from the sanctioning of these additional seats on the Council. Two alternative methods of election, or selection, therefore suggest themselves. One is through the Kowloon Residents' Association and the other is through the Jury List. The former, we most definitely state, should not receive one atom of consideration, for that body, an admirable body, is in no sense representative of the people of Kowloon. The latter method, through the Jury List, would be the most workmanlike and, under the circumstances, the most satisfactory. Which is not to say, however, that it is a method in any way perfect or one which would satisfy the aspirations and wishes of the people generally. However, we have to be thankful for small mercies, and the step authorised in the new instructions hope gone, she turned back for are in the villages and rural disis most decidedly one in the right direction.

The Young Idea

Two schools of thought conflict with each other in their views on the social evolution of the Chinese youth in Hong Kong. There is the imitative type of Chinese boy, who cannot even qualify for "lounge lizard" or the "manikinish" namby-pamby so well known in some western countries. As rare as life Dr. Langehas possessed peroases in the desert is the product | fect health. of benevolent influence of environment on character. There are also a very few who have imbibed Occidental culture and then gone back to the recognised Chinese style of living. There is no true type of conservative or radical, but a comedian, was so poor that he was the following sentence on a blackbit of everything rolled into one, glad to earn a shilling carrying a board: "There is no such word as despite what the protagonists of traveller's bag to the railway sta- fale." as to what is good and bad. PARIS NOTES

Clothes For The Riviera

All black and all white and a combination of the two are chic this season for sport and semi-sporting clothes. A white wool skirt and jumper has a black cardigan flecked with white, worn with a Black felt hat and a scarf and belt striped black and white.

Cardigan coats in patterned satin and foulard are worn - for smart occasions as well as for sport. beige and red small-patterned foulard cardigan looks well over an all beige jumper suit of crepella worn with a red hat, beige belt, and pochette.

White wool frocks are worn with black and white tweed coats. A black jersey suit with a gay beige and red wool scarf has a black top coat of "matt" lined beige wool fabric and embroidered.

For Biarritz white and red will be much seen, as well as two shades of green. All white is always fashionable, and if relief is necessary then black or green are best. There are also some smart ensembles in white flannel, with sweaters in black and white stripes.

The prevalence of black for sports clothes is a new and interesting fashion point. Many women have. discovered the many becoming attributes of black, especially in a clear sunlit atmosphere. A wardrobe mostly composed of all black and all white eliminates unnecessary garments, and such a dress scheme for day or evening can be sure of a certain sartorial exclusiveness that is all to the good.

#### Had He Lived!

If this poverty had roused influential contemporaries half as much as it has roused posterity (which can hold itself blameless the matter), Schübert might have died a rich man and lived to be an old one. Had he lived the normal span the music of the nineteenth century would have had some rare additions.

We are apt to regard Schubert, who died only a year after Beethoven, as far more remote than he actually is. No one is alive to-day who knew him, but many are alive who knew men born in the same year. His intimate friend and drinking companion. Doppler, met Sullivan and Grove in Vienna when they were searching for the "Rosamunde" music.

As a man not much above middle age, Schubert would have heard the operas of Richard Wagner, the symphonies of Brahms, and even, Strauss.

Wagner was, after all, only fifteen years younger.

Yet his fame is, perhaps, sufficient, even if contemporary opinion hinted that there were more and greater things to be done. Schubert, after lying in state, as Mr. deaf-"or, was it, blind?" Newman Flower, the most recent of his biographers tells us, "dressed in the garb of a hermit, with a

Very rarely does the quality deteriorate, and of the six hundredand-three songs which form his outstanding achievement there are barely a score which could be spared, and there is hardly a dull bar in one of them.

It is not a fair judgment to hint that there are very few bars in any of Beethoven's songs that are his own ground, whereas Beeth- a dollar note for a waffle and a cup One hundred years ago, Franz oven falls lamentably short in of coffee.

"LOVES OF PHARAOH"

#### Superb Acting in Historical Production

"The Loves of Pharaoh," a spectacular historical film will be the feature attraction at the Star Theatre on Saturday and Sunday next. The story, which is skilfully unfolded to contrast the destiny of individuals with the destiny of nations, is of absorbing interest taking the spectator into the homes, the palaces and the temples of the great people who built the pyramids. The settings are on a magnificent scale, and the battle acenes, including the sack of .Thebes, are as wonderful as anything of the sort yet offered by the screen. The acting is superb. Emil Jannings as Pharaoh gives a performance sufficient in itself to make the film a masterpiece,

#### WHOLESOME COMEDY

Excellent Story In New Fox Picture

Something new in theme and plot is furnished in "Love Hungry," Fox Eilms latest release, which is the chief item in the programme at the Queen's Theatre on Tuesday and Wednesday. It is a happy, joyous comedy romance of youth and a fascinating and revealing story of the inner workings of a metropolitan newspaper office, especially as it applies to the "sob sisters." In this case the "sister" is a man played with non-de-plume under which a which may be seen at the Queen's and was filmed in Italy and Cali- night vigil has almost the same subject.

#### "EMDEN" FILM

Coming Shortly To The Queen's

At the beginning of the "Emden" film, soon to be seen here, a note explains that the picture was produced with the full co-operation of the German Admiralty, and following it, the film's British sponsors, the "New Era" have added that the film is so fair and honourable to Britain that they had no hesitation in showing it in England. That is certainly true. There is not a trace of malice or hatred. There is not a dishonourable act in all the destructive progress of the "Emden," even to ah enemy. The German sailors are heroes, human, honest, and generous, and their encounters with the British are no more than war necessities and just honourable rivalries. "Emden" is the German compliment which Britain so well acknowledged with "The Battles of Coronel and Falkland Islands." These films are bigger-minded than national war films. They have as their themes the unwritten tradition which knows pride and heroism, and has no room for petty | quarrel.

# "THE ENEMY"

#### Lillian Gish In A Striking Role

A NIGHT VIGIL

The heart-gripping night vigil

in Puccini's "Madame Butterfly"

has a remarkable parallel in "The Enemy," Lillian Gish's new Metro-Goldwyn-Mayer vehicle coming on Thursday to the Queen's Theatre. in which, under the direction of watching the relentless hands of the clock, ever moving toward their separation, perhaps forever. As worked out in the screen play, this vigil in the dark is one of the most powerful dramatic touches in the history of the screen. The new picture is a story of Austria during and after the war, in which Miss Gish plays the daughter of a university professor, who sees her family torn apart by war hatreds and the hysteria of battle times. The play, on the stage, was hailed as one of the drama's greatest contributions to the cause of international understanding. Gish and Ralph Forbes head a notable cast that includes George Fawcett, Frank Currier, Ralph Emerson, Karl Dane, Polly Moran, Fritizi Ridgeway, John Peters, Billy Kent Schaefer and others of note. Fred Niblo, who directed "The Enemy," also directed the famous picture "Ben Hur."

#### "HOT WATER."

#### Harold Lloyd's Famous Comedy For World

Harold Lloyd will be seen in his splendld comedy "Hot Water" at the World Theatre on Saturday and Sunday next. As usual, Lloyd's side-splitting situations are or ginal. The story opens showing Harold as a happy-go-lucky bachelor who would no more think of marrying, than he would think of starting out for the North Pole in a pair of pajamas. It isn't lons before Nemesis appears on the scene, in the person of little Jobyna Ralston. Events take their natural course and Harold finds himself trying, unsuccessfully, to prove that two can live as cheaply as one. When all seems lost, Hubby takes things in his own hands and the film ends in a veritable cyclone of riotous fun and laughter.

#### LAWRI CE GRAY PLAYS PART FROM LIFE

Lawrence Gray, who plays the leading masculine role opposite Lols Moran in "Love Hungry," was born in San Francisco and at one time pounded a typewriter in the news room of the Bay City's leading daily newspaper. #### FOLLOW GREAT MEN

Since men for the most part follow in the footsteps and emulate the activities of others, and yet are unable to attain to the virtues of those whom they would resemble, the wise man should always follow the roads that have been trodden by the great and imitate those who have most excelled, so that if he cannot reach their perfection, he may at least acquire something of its savour, acting in this like a skilful archer, who seeing that the object he would hit is distant, takes aim much above the destined mark; not designing that his arrow should strike so high but that, flying high, it may alight at the point intended.

Officers' Honour "There used to be thought to be some sort of honour between military men, but perhaps that does not survive in all quarters in these times." This comment was made by Lord Merrivale in the Divorce Court, when he granted Mr. James Archibald Morrison, formerly a major in the Grenadier Guards a decree nisi against his 5 wife, Edith Dorothy, on the ground of her misconduct with Mr. Thomas Warner, a captain in S the Scots Guards, against whom an order was made for costs. Mr. and Mrs. Morrison were married in November, 1920, and afterwards lived at Basildon Park, Reading, and South-street, Parklane. They met Mr. Warner at the winter sports at St. Moritz in 1927. The evidence showed that Mrs. Morrison and Mr. Warner went to Cornwall together. was stated that in June last Mr. Warner's wife obtained a decree nisi against him because of his misconduct with Mrs. Morrison.

The Weekly paper that saves you the trouble of writing Home.

Sufficient time has elapsed to think about the interchange of gifts during the Festive Season. Has it ever struck you that there are some presents which will be appreciated, especially in other parts of the world? You are strongly recommended to hand in an address to the "Overland China Mail" — the only illustrated weekly news budget published in Hong Kong — for numbers to be sent for any period you like. The senders are assured of the approbation of those receiving the "Overland."

For years the "Overland," full of informative articles, "local" and "China" news, and topical pictures (supplied by the pioneer service in the Colony), has served as a strong link. between Hong Kong and people elsewhere.

Concurrent with the simultaneous exposure of Communist . activities in Hong Kong and in Canton, a special article has been included in the "Overland" dealing with the "Christian. General," who is alleged in some quarters to be a Red still. The article also explains how Britain and other countries view the Soviet policy towards China, a policy portending dire results to the world if it were allowed to have effect.

Fiat Wins 1928 Championship. Active in races and competitions of all kinds, in every part of the country, the 9 h.p. Fiat 509 model has won the Italian Championship for 1928, in the 1100 c.c. class, as the result of the greatest number of successes. Recently this car won a similar award in Switzerland, where it has held the championship for two consecutive years.

Germany Forging Ahead The fact that the number of motor cars in Germany has increased by over 30 per cent. during the past year is revealed by a study

of the figures showing the number of vehicles in use on July 1, 1928. as compared with July 1, 1927. The actual figures in the case of cars are 267,774 in 1927, and 351,380 in 1928, whilst the figures for the total number of vehicles in use on the two dates are 679,895 and 938,812.

Motor Ship Production in 1928. When the complete figures are suited in a sentence of 14 months' available, it will be found, accord- imprisonment, perpetual withing to "The Motor Ship," that the drawal of his licence, 21,200 francs number and tonnage of motor indemnity, 1,160 francs costs, and vessels built throughout the world a fine of 500 francs. in 1928 will be 50 per cent. greater than during the previous year. I is estimated that the total will reach-114 million tons gross, compared with 816,000 tons gross in 1927. The rapidity of the growth of popularity of the motor vessel is illustrated by the fact that in 1923 the ships of this class that were built totalled rather under one quarter of a million tons gross, or 20 per cent, of the corresponding figure this year.

Service Stations

With sixteen directly controlled sales and service organisations throughout Italy, a further eighteen in other countries, and a network of nearly seven thousand agents and concessionaires, the Fiat Company is now in a position to provide adequate service to its owners in every part of the world. In Italy the Fiat service stations are so numerous that if they were placed in a straight line they would stretch from one end of the peninsula to the other with gaps of only 220 yards between them. At the present time 85,000 people are directly engaged in the manufacture of Fiat cars, this, it is believed, being the biggest staff in Europe.

Nowadays in Denmark when times are bad and a man loses his job-such is the thrift of the Dane that he always has something "put by"—he taps his savings, buys a car which he keeps shining and polished and goes into business for himself as a taximan. In this enterprising way, a great many Danes tided themselves over the late unemployment period and contributed their share to keeping other men in jobs.

#### UNEVEN BRAKING

Very often one of the rear-wheel brakes does not act so effectively as the others. When this occurs there are several things to which the trouble may be attributed. The first is that grease or oil has found its way on to the brake drum. The oil may possibly have leaked from the back axle, in which case the felt washer used to prevent such leakage may need renewing; it may be that you have been over zealous in lubricating the brake cam with the grease or oil gun, so that there has been too much lubricant delivered at this part, and it has worked its way into the drums. Perhaps some part of the brake gear has become bent, or it may be that the rods and lovers are not moving freely.

It has been found that the nuts holding the cross-shaft which sunports part of the brake goar have become loose so that' the shaft wobbles-about considerably when the pedal is depressed.

Lord Cecil's Bill, which has the very laudable object of seeking to reduce the number of road accidents, is not likely to get very far. It was introduced in the House of Lords the other day, but in the opinion of most people it has no chance of passing into law. If it had we should have heard more about it, for the motor trade would have had something to say against a measure which was so restrictive in char-

> Lord Cecil would have us drive at not more than 20 or 30 miles an hour, and he would make the fitting of a device to prevent higher speeds compulsory on all Further, he proposes to make all drivers pass a test of their skill in driving, and he wants compulsory insurance covering third party risks.

> > No Speed Limit?

I cannot help wondering whether he has ever considered the congesion which would result on all busy roads were a mechanical check on the speed of vehicles to be imposed. Traffic would quickly get into such state of chaos that no one would want to travel by road. People would cease to buy cars, and one of

What is wanted are fewer restrictions and speed limits, and it is hoped that when the new Road Traffic Bill is presented in its final form it will be found that while increased penalties have been imposed for dangerous driving, there is no fixed speed limit.

Incidentally, it may be mentioned that there is no possibility of the Road Traffic Bill coming before the present Parliament. The delay is to be regretted, for it is now nearly two years since the draft Bill was circulated for discussion by the various public and trade organisations chiefly affected by it.

#### RAIN STAINS

Owners do not always find it convenient to wash their cars after every outing, and at the same time they dislike the spotting which takes place on the bonnet if raindrops are allowed to dry. The heat of the engine affects the bonnet and cold rain striking the surface produces unsightly blotches. These will not have time to do much harm if they are removed with a clean chamois leather before they dry. Old stains can frequently be removed by gentle rubbing with an exceedingly soft cloth upon which has been placed a few drops of boiled oil. This should not be depended upon too much, 3 however, as a too frequent application of oil affects the finish.

A couple of minutes spent with clean water, sponge and chamois 3 on the bonnet alone is simply | ? repaid.

#### TRADE FIGURES

British Gain In

ART SILK EXPORTS

London, Friday. The complete provisional figures of British trade during 1928, issued by the Board of Trade, show a slight improvement on the pre-

vious year. The adverse balance of imports over all exports is £350,000,000. The figure for 1927 was £286,000,000, and for 1926 it was £462,000,000.

The actual total of imports in 1928 was £1,196,000,000, while ex ports amounted to £723,000,000 and re-exports to £120,000,000.

The greater part of the difference between exports and imports is, of course, balanced by what are termed invisible exports, the chief elements in the calculation of which are earnings of British shipping and interest on invest ments abroad.

There was a notable increase in the exports of artificial silk the value of which rose to £1,175,000.

Among the exports which show decreases are coal (£6,500,000), iron and steel (£2,500,000) and cotton goods (£3,500,000).--British -Wireless Service,

LACK OF FUNDS

UP AGAINST IT

London, Friday. As a result of the depression in the coal-mining industry, the Miners' Federation has been faced with the question of providing adequate funds to enable it to have a sufficient number of Parliamentary candidates at the coming General Election.

The Federation, at a meeting today, however, decided to run the same number of candidates as last year, and, in order to meet the expenditure, adopted a scheme whereby the Political Fund is to be readjusted so that the richer districts will contribute to the support of the poorer districts.

Members of Parliament representing miners have agreed on a voluntary reduction of their allowance from the Federation.-British Wireless Service.
